

TechX Ltd – Premium AI Website System

Investor & Buyer Pitch Pack

Executive Summary:

TechX Ltd offers a complete, investor-grade AI web platform template.

Built with modern tools (React, Firebase, Tailwind), this turnkey system enables startups, agencies, and consultants to launch branded platforms instantly.

This pitch outlines:

- What the product is
- What it includes
- Licensing options
- Pricing tiers
- How to deploy or customize

1. Overview

A modern, customizable AI business website template designed for startups, consultancies, and tech companies. Built with React, Firebase, and Tailwind CSS, it offers full email integration, mobile-first design, and auto-deploy CI/CD. Ideal for developers and founders looking for an instantly deployable and beautiful frontend system.

2. Value Proposition

- ⚡ Ready to deploy in minutes
- 🧠 Includes intelligent contact & email delivery
- 🎨 Designed with premium UI and modern UX
- 🏠 Modular for any startup (SaaS, AI tools, consultancies)
- 🔒 Secure, scalable, and professional grade

3. Core Features

- Firebase Hosting + SSL
- Replit/CI/CD GitHub Deployments
- Contact Form → Email + Storage
- Tailwind + shadcn/ui components
- Hero, Vision, Products, Roadmap, and Contact sections
- Fully white-label ready

💰 Financial Ask (Investor Edition)

- **Funding Required:** £25,000
- **Use of Funds:**
 - Productized Template Licensing Setup
 - SEO and Customizer App (no-code)
 - Onboarding materials and email capture flows
- **Optional Exit:** White-label licensing or integration into SaaS

🌐 Competitive Matrix

Feature / Platform	TechX Template	OpenAI Site	Claude / Anthropic	Perplexity
Customizable Template	✓	✗	✗	✗
Built-In Firebase / SMTP	✓	✗	✗	✗
Developer Friendly	✓	✗	✗	✗
AI Integratable	✓	✓	✓	✓
White-Label Ready	✓	✗	✗	✗

Mission Slide

“We started this template to empower underfunded, brilliant minds with the same design power as billion-dollar AI companies.”

For every founder with a vision, this tool removes the UI, devops, and delivery barriers.

Ethics One-Pager

We respect:

-  Transparency in data handling (no analytics tracking by default)
-  Ethical branding — no deceptive testimonials or inflated promises
-  Accessibility and responsive design for all screen types
-  Affordable access — pay once, use forever license available

A done-for-you startup foundation for founders/investors who don't want to code or start from zero

- ☐ A **startup founder** who needs a ready-made site
- ☐ A **non-technical business** that wants to launch fast
- ☐ A company that wants to **white-label** and skip design/dev
- ☐ A **government or investor-backed org** needing secure branding

Full React + TypeScript + Tailwind frontend

- ☒ Firebase Hosting + SMTP Email System
- ☒ Modern UI/UX with sections for investors
- ☒ GitHub CI/CD + PDF Pitch Pack
- ☒ Branded Demo + Docs
- ☒ Editable for any company White-label ready
- ☒ Guidance from you (if offered) Bonus consulting = extra value

Tier	What it Includes	Price
Lite	Code + setup guide	£2500
Pro	Code + email config + support	£8000
Agency	White label + help + branding + pitch	£25,000

Project Structure

```
corporate-website-template/
├── client/ # React frontend
│   ├── src/components/ # UI sections
│   ├── src/pages/ # Pages
│   └── src/lib/ # Utilities
├── functions/ # Firebase Cloud Functions
│   ├── index.js # Contact API
│   └── package.json # Function deps
├── dist/public/ # Built static files
├── firebase.json # Firebase config
└── .github/workflows/ # CI/CD
```

Installation & Deployment

Local Development

```
```bash
npm install
```

npm run dev

## **Firebase Deployment (Recommended)**

```
bash
CopyEdit
npm install -g firebase-tools
firebase login
firebase init
npm run build
firebase deploy
```

## **Replit Deployment**

- Import project to Replit
  - Set npm run dev as run command
  - Add .env with SMTP + email vars
  - Enable autoscale if needed
- 

## **Customization Guide**

- client/src/components/navigation.tsx — Company name/logo
  - client/src/components/footer.tsx — Company info
  - client/src/components/hero-section.tsx — Tagline + Intro
  - functions/index.js — Email SMTP config
  - tailwind.config.ts — Colors, fonts
  - firebase.json — Hosting/deploy settings
- 

## **GitHub Release**

You can download a .zip version of the template and pitch in the [Releases section](#) if you'd prefer to run locally or bundle for distribution.
